PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building and maintaining web and mobile applications in both enterprise and startup environments. Passionate about solving complex problems, learning, and making a positive impact through technology. Looking for a role that offers high-impact work and continued technical and professional growth.

PROFESSIONAL EXPERIENCE

Mountain Dev

Boone, NC

Technical Lead

November 2025 - February 2026

- Led team of 3 developers across multiple time zones to deliver a production MVP in 12 weeks - a web application for visualizing aerial emissions inspection data, with data export functionality supporting KMZ, Excel, and PDF formats for client reporting.
- Collaborated with leadership on system design; implemented full stack using FastAPI, Next.js, and PostgreSQL.
- Leveraged AI-assisted development tools (Cursor) to accelerate development and improve code quality.

ECR Software Corporation

Boone, NC

Full-Stack Software Engineer

January 2023 - October 2025

- Promoted twice in under three years, advancing from Junior to Expert based on technical ownership and consistent delivery. Received Rookie of the Year (2023) and two quarterly MVP awards.
- Debugged and resolved critical production issues across distributed client environments, including identifying a mobile app crash caused by SentinelOne injecting DLL into Apache Tomcat processes, blocking HTTP requests and causing timeouts, and tracing intermittent app unresponsiveness to database connection pool exhaustion.
- Led end-to-end mobile app lifecycle as sole engineer for iOS and Android, reducing crash rates by 25% while serving 1,500+ regular users.
- Eliminated 90% of critical vulnerabilities across 5+ applications by implementing NexusIQ and enforcing secure CI/CD pipelines.
- Reduced technical debt by 60% (measured via SonarQube); increased unit test coverage from 0% to 40% on legacy Java codebase (300k+ LoC).
- Represented engineering at annual customer conferences, presenting roadmaps and translating client feedback into development priorities.

EDUCATION

Appalachian State University

Boone, NC

Bachelor of Science in Computer Science

December 2022

SKILLS, TOOLS, AND TECHNOLOGIES

Languages: Java, SQL, Python, TypeScript

Frameworks & Libraries: FastAPI, Next.js, Vue.js, React, GWT

Databases: PostgreSQL, SAP SQLAnywhere

Infrastructure & Cloud: Apache Tomcat, Docker, AWS, REST APIs, Microservices

Tools: Git, SonarQube, NexusIQ, Maven, Poetry, Android Studio, XCode

Practices: Agile/Scrum, CI/CD, Unit Testing, Code Reviews, System Design
